About

I'm a senior Computer Science student at CSUN who enjoys building applications using Java and Spring Boot. I'm especially interested in full-stack development and understanding how systems connect from front to back.

Work Experience

Independent Contractor – Roadie (Los Angeles, CA) | 2025 – Present

- Plan and optimize delivery routes to meet strict time windows
- Maintain clear communication with customers to ensure accurate and timely drop-offs
- Handle packages carefully while following safety and verification procedures
- Demonstrate reliability and accountability as a self-managed contractor

Seasonal Associate – Fashion Nova | Winter 2018

- Assisted with picking, packing, and organizing inventory
- Worked in a fast-paced environment while maintaining accuracy
- Collaborated with team members to meet daily shipment goals
- Maintained organized work areas to improve efficiency and safety

Lime Scooter Charger – Lime | Aug 2019 – Jan 2020

- Located scooters using the Lime app and transported them for overnight charging
- Managed multiple pickups efficiently to maximize productivity
- Returned fully charged scooters to high-demand areas
- Worked independently while maintaining consistency and meeting deadlines

Education

California State University, Northridge (2022–2026)

Bachelor of Science in Computer Science
